

Conference on Means, Methods and Results in the Statistical Mechanics of Polymeric Systems II

June 12 - 14, 2017, The Fields Institute

Means and methods include multidisciplinary mathematical (from combinatorial to topological) and computational (from exact enumeration to Monte Carlo) approaches. Recent applications of results include everything from enzyme action on DNA to phase transitions in complex co-polymer systems. Through introductory and research-level talks, researchers will learn about the field, the latest advances and also celebrate the many contributions of Stuart Whittington.

Invited Speakers

Mahshid Atapour, Capilano University
 Marco Baiesi, Università di Padova
 Nick Beaton, University of Melbourne
 Hue Sun Chan, University of Toronto
 Harrison Chapman, University of Georgia
 Nathan Clisby, University of Melbourne
 Tetsuo Deguchi, Ochanomizu University
 Mark Dennis, University of Bristol
 Bertrand Duplantier, IPhT, Saclay
 Claus Ernst, Western Kentucky University
 Gokhan Yildirim, York University
 Gary Iliev, University of Georgia
 Ray Kapral, University of Toronto
 Cristian Micheletti, SISSA, Trieste
 Aleks Owczarek, University of Melbourne
 Eleni Panagiotou, UC Santa Barbara
 Nicolas Pétrélis, Université de Nantes
 Rob Scharein, Hypnagogic Software
 Koya Shimokawa, Saitama University
 Jon Simon, University of Iowa
 Attilio Stella, Università di Padova
 De Witt Sumners, Florida State University
 Michael Szafron, University of Saskatchewan
 John Valleau, University of Toronto
 Stuart Whittington, University of Toronto
 Uta Ziegler, Western Kentucky University

Organizing Committee

EJ Janse van Rensburg, York University
 Enzo Orlandini, Università di Padova
 Thomas Prellberg, Queen Mary University of London
 Andrew Rechnitzer, University of British Columbia
 Jeremy Schofield, University of Toronto
 Christine Soteros, University of Saskatchewan
